

NAC-1588MK

Powered subwoofer with a line array speaker

FEATURES

High efficiency "1000" W Class-D amplifier

Also at the top of its class for output power, the 1000W Class-D amplifier module so that the NAC-1588 MKII maintains the same accurate, superior-quality sound even at high output.

Advanced Impulse DSP Module

High-precision DSP processing technology 56 bits/192 kHz, Professional functionality with simple operation reducing setup time and streamlining system operation and allowing users to focus on their performance.

Digital control with four channel inputs

Four channel inputs. High-quality Bluetooth 5.0 connectivity audio streaming for background music or musical accompaniment. Ready to play in a few simple steps.

Vertical Line Array

4x5-inch woofers and one innovative HF driver achieves outstanding sound dispersion HxV delivering unparalleled crystal sound consistent, even HF response from the front of the room to the back.

World Class-leading 15-inch bass-reflex woofer extends low-end response to 35 Hz

15-inch speaker unit which is hardly "compact," By our own unique technology to reduce port wind noise that can occur with compact bass-reflex subwoofer, the low-end output is maximized, producing very deep, powerful, distortion-free bass.

Wireless Connection Pole Stand

Simple and fast installation, the height can be adjusted by using wireless pole stand. Upgraded thicker grille, mesh cloth is installed on the back of grille, which is not only beautiful without affecting the sound, but also protects the speaker from dust and water.

High-grade polyurea coating

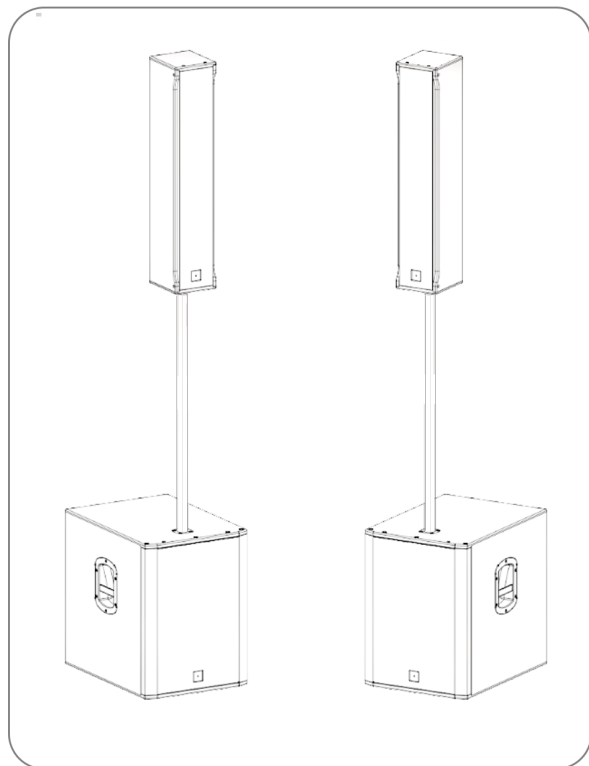

High-grade polyurea coating to prevent wear and tear during transport. It is light enough to make the system extremely portable, but also rugged and scratch-resistant enough to withstand harsh performance environments.

Superior Utility and Portability

It's the perfect solution for anyone who demands best-in-class power, acoustic performance, creative control and connectivity in a stylish, full-featured column PA that's ideal for both installed and portable applications.

MOUNTING

The system combines a reference-quality clarity and intelligibility, with a high dynamic SPL, the most powerful line-source in its class and offers a particularly profound and dynamic reproduction at high levels due to the built-in Class-D power amplifier. The top section has four high performance 5" full-range transducers with customized HF driver. As a result, the column has a significantly increased low-mid and treble playback at a constant level with a wide dispersion for the highs. The 15" subwoofer delivers powerful bass sound to reinforce a big party or the kick drum of a live band. Despite high performance, the enclosure is very compact, and thanks to extendable handle very easy to transport with exceptional intelligibility and dynamic output.

NAC-1588MK

MODEL	NAC-1588MK TOP	NAC-1588MK SUB
Components	4X5" woofer+44mm HF driver	1x15" subwoofer
Frequency Response(Hz)	35-20 KHz	
RMS Power(W)	350	500
Program Power(W)	700	1000
Max SPL(dB)	130	
Dispersion(HxV)	120°X30°	
Connector	Wireless	COMBO,Bluetooth,RCA
Product Weight(kg)	13.4	32
Gross Weight(kg)	15.5	34
Product Size(cm)(WxHxD)	18x88x20	44.5x60x61.5
Shipping Size(cm)(WxHxD)	23x94x29.5	48.5x65.5x65
Amplifier Module		
Output Power(EIA test Standard, 100HZ 1% THD)	2X500W/4ohm	
S/N	>95dBA(A weighted)	
Damping Factor	>500 (20Hz-100Hz)	
Protection	Over voltage protection up to 264V AC, Overload output protection, clip, limiter	

BACK PANEL
